CONTENTS OF VOLUME 48

PART 1 (March 1992)

Mixed-effects nonlinear regression for unbalanced repeated measures ..... E. F. Vonesh and R. L. Carter 1
Parametric variance function estimation for nonnormal repeated measurement data ..... M. C. Paik 19
Power calculations for likelihood ratio tests in generalized linear models
S. G. Self, R. H. Mauritsen, and J. Ohara 31
The impact of stopping rules on heterogeneity of results in overviews of clinical trials
M. D. Hughes, L. S. Freedman, and S. J. Pocock 41
A class of Phase II designs with three possible outcomes ..... B. E. Storer 55
A rank-based mixed model approach to multisite clinical trials ..... D. D. Boos and C. Brownie 61
Maximally selected rank statistics ..... B. Lausen and M. Schumacher 73
A comparison of tests of the difference in the proportion of patients who are cured
R. Sposto, H. N. Sather, and S. A. Baker 87
Prediction in censored survival data: A comparison of the proportional hazards and linear regression models ..... G. Heller and J. S. Simonoff 101
A discrete-time model for the statistical analysis of infectious disease incidence data
A. H. Rampey, Jr., I. M. Longini, Jr., M. Haber, and A. S. Monto 117
N-estimation from retrospectively ascertained events with applications to AIDS
M.-C. Wang and L.-C. See 129
Estimating blood phenotype probabilities and their products ..... S. R. Greenwood and G. A. F. Seber 143
A reduced-rank multivariate regression approach to aquatic joint toxicity experiments
D. A. J. Ryan, J. J. Hubert, E. M. Carter, J. B. Sprague, and J. Parrott 155
Quantitative risk assessment for developmental toxicity ..... L. Ryan 163
Estimating the ventilation–perfusion distribution: An ill-posed integral equation problem
L. L.-Y. Lim and J. Whitehead 175
Estimating strata means in double sampling with corrections based on second-phase sampling
H. G. Li, H. T. Schreuder, D. D. Van Hooser, and G. E. Brink 189
Estimating population size for capture–recapture data when capture probabilities vary by time and individual animal ..... A. Chao, S-M Lee, and S-L Jeng 201
A modelling strategy for recovery data from birds ringed as nestlings
S. N. Freeman and B. J. T. Morgan 217
A Kalman filter approach to catch-at-length analysis ..... P. J. Sullivan 237
Shorter Communications
The choice of loglinear models in contingency tables when the variables of interest are not jointly observed ..... M. Mesbah, J. Lellouch, and C. Huber 259
A note on the additive and multiplicative models in two-way contingency tables ..... M. Tsujitani 267
The Consultant's Forum
Methods for estimating the parameters of a linear model for ordered categorical data ..... S. R. Lipsitz 271
Computer-assisted analysis of mixtures (C.A.MAN): Statistical algorithms
D. Böhning, P. Schlattmann, and B. Lindsay 283
Interval mapping in the analysis of nonadditive quantitative trait loci
E. A. Carbonell, T. M. Gerig, E. Balansard, and M. J. Asins 305
Reader Reaction: Exact likelihood evaluation in a Markov mixture model for time series of seizure counts ..... N. D. Le, B. G. Leroux, and M. L. Puterman 317
Response ..... P. S. Albert 322
Correspondence 325
Book Reviews 329
Papers to be published 335

PART 2 (June 1992)

On the design of genome mapping experiments using short synthetic oligonucleotides
Y.-X. Fu, W. E. Timberlake, and J. Arnold 337
Performing the exact test of Hardy–Weinberg proportion for multiple alleles
S. W. Guo and E. A. Thompson 361
A new procedure for group sequential analysis in clinical trials ..... B. Falissard and J. Lellouch 373

Sample size determination for case–control studies and the comparison of stratified and unstratified analyses . . . . . J. Nam 389
When does it pay to break the matches for analysis of a matched-pairs design? H. S. Lynn and C. E. McCulloch 397
Relative risk trees for censored survival data . . . . . M. LeBlanc and J. Crowley 411
Bayesian restoration of single-channel patch clamp recordings . . . . . D. R. Fredkin and J. A. Rice 427
Estimation of the size distribution of fibrillar centres in nucleoli—An example of the "Swiss cheese" problem in stereology . . . . . N. Keiding and L. Andersen 449
On the use of historical control data to estimate dose response trends in quantal bioassay R. L. Prentice, R. T. Smythe, D. Krewski, and M. Mason 459
Estimating exposure effects by modelling the expectation of exposure conditional on confounders J. M. Robins, S. D. Mark, and W. K. Newey 479
A coupling procedure for the discrimination of mixed data . . . . . K.-D. Wernecke 497
Assessing influence in regression analysis with censored data . . . . . L. A. Escobar and W. Q. Meeker, Jr. 507
An empirical assessment of saddlepoint approximations for testing a logistic regression parameter E. J. Bedrick and J. R. Hill 529
Maximum-penalized-likelihood estimation for independent and Markov-dependent mixture models B. G. Leroux and M. L. Puterman 545
An inferential procedure for the Poisson intervention parameter . . . . . R. Shanmugam 559
Interval estimation for mark–recapture studies of closed populations . . . . . R. M. Cormack 567
Shorter Communications
A simple method for the analysis of clustered binary data . . . . . J. N. K. Rao and A. J. Scott 577
On prevalence, incidence, and duration in general stable populations . . . . . J. M. Alho 587
Use of baseline data for estimation of treatment effects in the presence of regression to the mean S. Chen and C. Cox 593
Assay validation using the concordance correlation coefficient . . . . . L. I-K. Lin 599
The Consultant's Forum
The effect of diagnostic misclassification on non-cancer and cancer mortality dose response in A-bomb survivors . . . . . R. Sposto, D. L. Preston, Y. Shimizu, and K. Mabuchi 605
Estimating compliance to study medication from serum drug levels: Application to an AIDS clinical trial of zidovudine . . . . . L. L-Y Lim 619
Generalized linear models with random effects: Salamander mating revisited M. R. Karim and S. L. Zeger 631
Efficacy of repeated measures in regression models with measurement error X. Liu and K.-Y. Liang 645
Book Reviews 655
Correction 661
Papers to be published 663

PART 3 (September 1992)

Regression models for an angular response . . . . . N. I. Fisher and A. J. Lee 665
Linear regression analysis based on Buckley–James estimating equation . . . . . J. S. Lin and L. J. Wei 679
Blocked arteries and multivariate regression . . . . . D. F. Percy 683
Testing the effect of treatment in experiments with correlated binary outcomes D. Zucker and J. Wittes 695
Testing goodness of fit of a multinomial model against overdispersed alternatives B. S. Kim and B. H. Margolin 711
Multivariate methods for clustered binary data with multiple subclasses, with application to binary longitudinal data . . . . . B. Rosner 721
A parametric family of correlation structures for the analysis of longitudinal data A. Muñoz, V. Carey, J. P. Schouten, M. Segal, and B. Rosner 733
Modelling balanced longitudinal data: Maximum likelihood estimation and analysis of variance A. Forcina 743
Exchangeability in multivariate Markov chain models . . . . . A. Gottschau 751
Sequential monitoring for comparison of changes in a response variable in clinical studies M. C. Wu and K. K. G. Lan 765
Use of external rates in nested case–control studies with application to the International Radiation Study of Cervical Cancer Patients . . . . . D. C. Thomas, M. Blettner, and N. E. Day 781
Semiparametric estimation of random effects using the Cox model based on the EM algorithm J. P. Klein 795

A statistical distribution with an unbounded hazard function and its application to a theory from demography ..... D. Zelterman 807
Robust procedures for testing equality of covariance matrices ..... P. C. O'Brien 819
Proportional hazards model with covariates subject to measurement error ..... T. Nakamura 829
Optimal administration of dual screening tests for detecting a characteristic with special reference to low prevalence diseases ..... S. Geisser and W. Johnson 839
Estimating the probability of toxicity at the recommended dose following a Phase I clinical trial in cancer ..... J. O'Quigley 853
Estimating the total number of distinct species using presence and absence data ..... S. A. Mingoti and G. Meeden 863
Sample size calculations for normal variates under binomial censoring ..... J. R. Skalski 877
Shorter Communications
Testing homoscedasticity in a two-way table ..... G. S. Mudholkar and I. C. Sarkar 883
An algorithm for the mean and variance of the noncentral hypergeometric distribution ..... J. Liao 889
The efficiency of a weighted log-rank test under a percent error misspecification model for the log hazard ratio ..... D. M. Zucker 893
A robust line transect method ..... S. T. Buckland and B. J. Turnock 901
The Consultant's Forum
A GLM approach to quantal response models for mixtures ..... C. Cox 911
Starting *D*-optimal designs for batch kinetic studies of enzyme-catalyzed reactions in the presence of enzyme deactivation ..... F. X. Malcata 929
Marginal models for correlated binary responses with multiple classes and multiple levels of nesting ..... B. F. Qaqish and K.-Y. Liang 939
Maximum likelihood estimation for interval-censored data using a Weibull-based accelerated failure time model ..... P. M. Odell, K. M. Anderson, and R. B. D'Agostino 951
Reader Reaction: On estimating standardized risk differences from odds ratios ..... K. F. Yu 961
Response ..... S. Greenland and P. W. Holland 963
Reader Reaction: A note on modelling the covariance structure of repeated measurements ..... P. S. Gill 965
Correspondence 969
Book Reviews 973
Correction 979
Papers to be published 981
The Biometric Society 983

PART 4 (December 1992)

Classical and Bayesian prediction as applied to an unbalanced mixed linear model ..... D. A. Harville and A. L. Carriquiry 987
Adjusted *P*-values for simultaneous inference ..... S. P. Wright 1005
The analysis of multistratum and spatially correlated repeated measures data ..... A. P. Verbyla and B. R. Cullis 1015
Group sequential distribution-free methods for the analysis of multivariate observations ..... J. Q. Su and J. M. Lachin 1033
Two-sample nonparametric estimation and confidence intervals under truncation ..... R. A. Johnson, C. H. Morrell, and A. Schick 1043
Percentile smoothing using piecewise polynomials, with covariates ..... H. Goldstein and H. Pan 1057
Testing for heterogeneity of evoked potential signals using an approximation to an exact permutation test ..... J. Raz and G. Fein 1069
Inverse estimates from a multiresponse model ..... G. P. Y. Clarke 1081
Latent variable models for clustered dichotomous data with multiple subclusters ..... Y. Qu, G. W. Williams, G. J. Beck, and S. V. Medendorp 1095
A table of exact sample sizes for use with Fisher's exact test for 2×2 tables ..... Y. X. Fu and J. Arnold 1103
An approximate bivariate Bayesian method for analyzing small frequencies ..... C. M. DeSouza 1113
Effects of assumption violations on Type I error rate in group sequential monitoring ..... M. A. Proschan, D. A. Follmann, and M. A. Waclawiw 1131
Robust designs for binary data ..... R. R. Sitter 1145
Investigation of dual-balanced crossover designs for two treatments ..... K. C. Carrière and G. C. Reinsel 1157
Modélisation spatio-temporelle d'une epidémie par un processus de Gibbs: Estimation et tests ..... J. Chadœuf, D. Nandris, J. P. Geiger, M. Nicole, et J. C. Pierrat 1165
Bounds for the upper-tail probabilities of the circular ratchet scan statistic ..... J. Krauth 1177

Smoothing serial count data through a state-space model ..... N. Kashiwagi and T. Yanagimoto 1187
An adaptive procedure for sampling animal populations
S. K. Thompson, F. L. Ramsey, and G. A. F. Seber 1195
Integrated area sampling and mark–recapture experiments for sampling fish populations
A. L. Jensen 1201
Shorter Communications
Evaluating correlation with proper bounds ..... W. J. Shih and W.-M. Huang 1207
Maximum likelihood estimation of the risk ratio in case–cohort studies ..... T. Sato 1215
Nonparametric estimation and testing in a cure model ..... E. M. Laska and M. J. Meisner 1223
The Consultant's Forum
Optimal design in nonlinear multiresponse estimation: Poisson model for filter feeding
C. Hatzis and K. Larntz 1235
Estimation of completeness and adjustment of age-specific and age-standardized incidence rates
S. G. Hilsenbeck, C. Kurucz, and R. C. Duncan 1249
Functional comparative calibration using an EM algorithm ..... D. K. Kimura 1263
Analysis of two-dimensional electrophoretic gels ..... K. Conradsen and J. Pedersen 1273
Reader Reaction: An invalid comparison of several point estimators of the odds ratio in a single 2×2 contingency table ..... N. Mantel 1289
Response ..... S. D. Walter and R. J. Cook 1292
Book Reviews 1297
Papers to be published 1305
Acknowledgements 1307
The Biometric Society 1309
